

I believe that my freedom and choice to receive important information via my XM Radio are protected by the First Amendment. My safety while in my car can be enhanced by Instant Traffic & Weather reports.
I urge you (FCC) to reject the NAB's petition 04-160 and also Oppose HR 4026.

With the Homeland Security and most recent Weather this week in State of Kentucky -- Lexington, Ky experienced devastating storms and damages due to possible F2 / F3 weather -- thus the reporting of such MAJOR WEATHER events would protect individuals and families !!!

Please do not take my rights to Safety away by voting for HR4026.
Respectfully, Matt Tierney
